

DENBOW

innovating naturally

Denbow offers a variety of quality soil blends for many applications:

Blended Amender

- Contains 12.5% sand for areas requiring improved water retention.

Garden Blend

- Composted organics blended with 25% sand. Ideal for flower and landscape gardens.

Turf Blend

- Composted organics blended with 50% sand for excellent drainage.

Veggie Blend

- For maximum vegetable yield

SOILS & SOIL AMENDERS

Our quality blended soils are comprised of organic green waste compost mixed with river sand. During the composting process, the soil naturally heats to more than 55°C, thereby destroying weeds and weed seeds. Produced following stringent guidelines, these soils are regularly laboratory tested to ensure the production of a consistently high quality product.

"I like to call your Garden Blend Soil "Black Gold!". It is such a high quality product and is working wonders in my flower gardens. Thank you!" ☺

Terraseeding

Denbow's soils can also be seeded and/or fertilized with our unique Terraseeding™ process. Through Terraseeding, soil is combined on-the-fly with fertilizer and seed mix and blown-in from our Express Blower trucks. You save time and money - and perhaps just as importantly - ensure the best possible chance of seed germination.

Pneumatically-blown Soil

In many applications, it makes sense to have our skilled crews save you precious time by blowing-in our soil blends for you. We have blown soil 13 storeys high and 400 feet from the truck!

We recommend considering pneumatically-blowing in soil in any of these applications:

- ✓ Flower Beds
- ✓ Green Roofs
- ✓ Rooftop Terraces
- ✓ Steep slopes
- ✓ Turf Areas
- ✓ Land & Stream Reclamation
- ✓ Indoor and Outdoor Gardens
- ✓ Highway and Roadside Construction or Maintenance
- ✓ Environmentally Sensitive Areas
