

## Express Blower Truck Services

### Installation of revitalized forest residuals

With Denbow's Blowing Service, the time-consuming, labour-intensive task of manually placing landscape materials is a thing of the past. Using our sophisticated fleet of Express Blower™ trucks, our trained and skilled operators place bulk materials precisely where needed, more than 400' from the truck. Plus, there's no mess left behind, and there is no heavy equipment to damage the landscape.

Installation via blower truck reduces labour, cleanup and equipment costs - and more importantly - saves you time when compared to conventional installation methods.

Denbow is great at working with our logistically challenging sites and schedules. The sales team makes things happen. Schedules often change last minute and you accommodates those changes.
