

Poultry Bedding.

Denbow has been delivering quality poultry bedding to Fraser Valley farmers and producers for over twenty-five years.

We supply a variety of sawdust and shavings blends. We have built long-term relationships with various sawmills in order to ensure a consistent & quality supply of sawdust year round. Delivery is available in any quantity you require, either as bulk pushout delivery or blown directly into barns with our fleet of blower trucks.

Our Promise

We strive for excellence and work to deliver on the scheduled day, with a reminder call or email the day before. We take bio-security seriously and do not haul poultry litter in our trucks. Our phone is answered live 24-hours a day in case of emergency. We have a fantastic team of professional, courteous people to serve you!

“ We chose Denbow because of their superior product, reliable delivery, and they do a great job overall. They have great staff, they do a great job without my supervision, and they take biosecurity seriously. Keep up the great service!

Serving you

Poultry Bedding

Coastal Sawdust for poultry is bright, great smelling and lightweight. This is an excellent choice for urine and ammonia absorption, odour and fly control. Species include cypress, hemlock and fir.

Interior Sawdust is a drier alternative made from spruce, pine and fir. We bring it in from BC's interior; we do not haul poultry litter as an up-haul due to biosecurity concerns.

Putman's Poultry Paper

Now supplied & delivered at the same time as your sawdust with just one call! Placing paper with feed under the drinking lines guides new chicks to both drink and feed as quickly as possible. Paper "guides" chickens to the drinking-water system. When touched by chicks, the poultry paper produces a rustling sound which attracts the animals to that area.

Benefits include improved distribution of chickens throughout the barn, improved weight gain in the first 7 days and greater uniformity of the flock. The paper provides better insulation therefore lower mortality rates. It is highly degradable and breaks down in the litter.

Available in various widths and lengths. Call us to find out what would work best for your barn(s).
