

Denbow Agriculture Services now offers Putman Poultry Paper

Placing paper with feed under the drinking lines guides new chicks to both drink and feed as quickly as possible.

BENEFITS

- Paper "guides" chickens to the drinking-water system
- When touched by chicks, the poultry paper produces a rustling sound which attracts the animals
- Improved distribution of chickens throughout the barn
- Improved weight gain in the first 7 days
- Greater uniformity of the flock
- Better insulation therefore lower mortality rates
- Breaks down in the litter - highly degradable
- One call to order sawdust and paper
- Supplied & delivered at the same time as your sawdust delivery!

Available in various widths and lengths. Contact our team today to find out what would work best in your barn(s).
