

Soils.

Soils are the foundation of any successful landscape. At Denbow, we provide a wide range of high quality manufactured soils to meet your specific needs.

In addition to bulk supply, our fleet of express blower trucks can blow soil for many applications, including regular ground level landscaping, slopes, rooftop gardens and greenroofs.

Our Promise

Our soils are comprised mainly of organic green-waste compost mixed with sand at various ratios to meet specifications. We don't use residential yard waste to avoid plastic and foreign objects in our finished products. During the composting process, the soil is heated to more than 55°C. This effectively destroys weeds and weed seeds and guarantees a high quality product.

I like to call your PlantZone Soil "Black Gold!". It is such a high quality product and is working wonders in my flower gardens. Thank you!

Soil Services

Manually placing soil can be a time consuming task, and if not performed properly can damage the surrounding environment. We provide professional installation services using our blower trucks with skilled, experienced experts. This ensures the soil is spread evenly, there is no damage to lawn areas and best of all, it saves you time to work on other projects or relax!

PlantZone

PlantZone™ - Our premium planting blend is made for and used by professionals and homeowners alike. The proper proportions of composts and sand go into our PlantZone soil, allowing plants, trees, and shrubs thrive for years to come. Meets or exceeds landscaping standards; quality controlled and lab tested.

NutriMend

NutriMend™ - Used as a mulch or blended into existing soil, NutriMend rejuvenates and revives depleted, tired soils. It is a rich blend of composts, proven to increase beneficial organic content and improve soil health. Add NutriMend and watch your plants flourish!

GroZone

GroZone™ - It all starts and ends with the soil you use. GroZone is our premium soil. High in beneficial organic matter, screened fine with a beautiful rich colour, it will enrich your plants. Specifically formulated for excellent growth of vegetables, roses, annual plantings and flower bed planters, with GroZone your plants will thrive. Ask for it by name.

TurfZone

TurfZone™ - Our TurfZone will have your grass "in the zone". Made with the correct blend of sand and composts, creating the idea environment for turf to establish quickly as well as maintain healthy vitality year round with basic maintenance procedures. Set your lawn up for success with TurfZone.

StructureZone

StructureZone™ - StructureZone soil is made with a proprietary blend of gap graded rock, a stabilizing compound and the proper soil to meet municipal structural soil specifications. StructureZone is integral to street tree growth and stormwater management, with the ability to support hard surfaces. Whether you require 1 truck load or 100, Denbow is poised to provide you with quality structural soil for your next project.

SkySoil

SkySoil™ - Introducing Denbow's own premium green roof growing media. SkySoil is lightweight, thoroughly tested, and made from the highest quality ingredients. Choose from either bulk delivery or installation direct onto the rooftop via our blower truck technology. To date, we have installed soil up 16 stories high. The sky's the limit!
