| Peace Arch border crossing | BC Ministry of Environment | Surrey, BC | Terraseeding™ |

Over the past years the City of Surrey has upgraded storm lines due to development growth of the area. During construction, the existing turf was disturbed and regrowth was slow.

The Ministry of Environment contracted Denbow to provide Terraseeding™ services around the Peace Arch border crossing. This process was chosen to ensure vegetation establishment prior to summer and to blend with the current turf areas.

Denbow's fleet of blower trucks worked together to efficiently Terraseed™, with minimal disruption to traffic flow and no damage to the existing turf.

There was green growth to the initial areas Terraseeded before the project was even completed. Photos below are one month after installation.
